

10 Reasons to do business with sqlaccounts™.com

1. It Works

We believe life is too short to punish yourself by using difficult, complicated and overpriced enterprise software. **sqlaccounts™** is designed to provide simple, no fuss financial accounting and comprehensive management information.

2. Continually improving

In a short time, **sqlaccounts™** has evolved into one of the easiest to use and most flexible financial accounting and management information systems available. Our licensing policy includes ongoing upgrades for free as we build additional and improves features into the system.

3. Work the way you want

Because we own **sqlaccounts™** we can do what we want with it which means you can receive software tailored to meet your business processes. No longer do you need to adjust your procedures to fit in with an accounts package – we will even build a management console specific to your business.

4. Powered by Microsoft® SQL Server™

sqlaccounts™ is based on Microsoft® SQL Server™. Benchmarked for scalability, speed, and performance, SQL Server is a fully enterprise-class database which means fast, effective data processing and world class innovation with support for all emerging technologies.

5. Delivered by a company driven by results, not technology

Unlike others, we are interested in improving your business processes through cost effective deployment of technology, and are not motivated by technology for its own sake.

6. Staff who understand and care

We have a team of professional staff who blend youth with experience and experience with innovation. We care, and our skills and experience extend way beyond IT.

7. If you call for help, we answer

We believe great support is part of having a great product. We don't hide behind call centres or voicemails – we are on hand daily to provide the support your business needs.

8. Great value

sqlaccounts™ represents best value when set against any other scaleable financial accounting and management information system.

9. A long term investment

sqlaccounts™ users can expect a one off investment in the system as the product continues to evolve. Your business will not outgrow **sqlaccounts™** as it is likely to do with standard packaged software.

10. Harness your existing investment in IT

sqlaccounts™ works with Microsoft Servers and Desktops, meaning there is every chance you have already invested in the skills and licenses to use the system.

Company History

sqlaccounts™ is designed and supported under BS EN ISO 9001:2000 standards. **sqlaccounts™** has been providing software to the Public Sector and medium sized companies since 1990.
